

SHUBHA PALLAVI

Product Manager | Building products that solve real problems

Nationality: German | Email: shubhapallavi.eesl@gmail.com

SUMMARY

A product Manager and an energy professional with 9+ years varied experience in the energy sector, currently sharpening a specific craft: taking ambiguous problems and turning them into shippable products. At ison GmbH, I owned 0-to-1 concept development for several new B2B2C platform products from problem definition through customer discovery, prototyping, and API specifications, then through to a market-ready release. That experience is the throughline of this portfolio: everything before it built toward it, and everything since has deepened it.

My earlier roles gave me the surrounding muscle: market and competitive research at Tibber, financial and investment-case building for unproven small-scale wind systems at XVentum, and large-scale execution discipline directing a nationwide public program (350M+ assets deployed) at the Ministry of Power, India. Bachelor's in Electrical Engineering and an MBA (Technical University of Berlin) ground this in both technical and commercial thinking.

WORK EXPERIENCE

PRODUCT MANAGER

ison GmbH (Corporate Venture of LichtBlick Energy utility) – Berlin, Germany | Oct 2023 – Oct 2025

- Owned 0-to-1 product development for ison Calculator & Funnel, a new B2B2C platform product currently in use by SMA customers across DE : defined the problem space, ran customer discovery through interviews and prototyping, and validated desirability before committing to build.
- Set product strategy and concept development from scratch, defining requirements and use cases and bridging the "what" and "why" across a multi-sided stakeholder base: utilities, OEMs, and end users.
- Defined API specifications, user stories, and user journeys, and established testing and QA protocols to take the product from concept to a market-ready release.
- Owned all product-facing content (website, launches, events) and led cross-functional execution across technical, business, and external stakeholders.

PRODUCT SPECIALIST

Tibber GmbH – Berlin, Germany | Feb 2021 – Sep 2023

- Ran market and competitive research to inform go-to-market and expansion strategy for new markets, an early rep for the discovery muscle later used at ison.
- Partnered directly with the co-founder and CPO on competitive analysis, product benchmarking, Willingness to pay, testing PmF where needed.
- Trained 150+ new employees on the complexities of power markets, flexibility, and virtual power plants (VPP), building organizational domain expertise.
- Identified and executed high-leverage, low-effort fixes to improve product exposure and performance.

ASSOCIATE BUSINESS DEVELOPMENT MANAGER

XVentum GmbH & enbreeze GmbH- Berlin, Germany | Aug 2019 – Jan 2021

- Evaluated investment processes and financing mechanisms to structure business plans and commercialization strategy for small-scale wind systems, early exposure to building a case for something unproven.
- Ran deep-dive market benchmarking and competitor hardware audits to identify market-entry opportunities across regional European markets.
- Authored investment pitches and market reports translating energy market dynamics into corporate development decisions.

PROJECT ENGINEER

Energy Efficiency Services Limited (Ministry of Power, India)- New Delhi, India

| Dec 2013 – Sep 2017

- Directed the large-scale rollout of nationwide public-facing distribution programs, supervising the deployment of 350 million+ physical assets and customer endpoints country-wide.
- Managed multimillion-dollar vendor procurement processes, contract negotiations, and compliance auditing protocols to align operational workflows with strict regulatory frameworks.
- Spearheaded public sector stakeholder management, bridging communications between central ministries and external implementation partners to drive large-scale program engagement.

EDUCATION

Master of Business Administration

2017–2019

Technical University of Berlin

Bachelors of Engineering (Electrical)

2008–2012

Maharishi Dayanand University

KEY SKILLS

Product Development: Problem Definition, Customer Discovery, Rapid Prototyping, Concept-to-Launch Ownership, MVP Scoping, Build vs. Buy Decisions.

Platform & Technical: API Specifications, Platform Technical Dependencies, Functional Requirements, Native iOS/Android Apps, Web Platforms, QA & Testing Protocols.

Analytics & Growth: A/B Testing, Data Analysis, Conversion Funnel Optimization, User Journey Mapping, Product Analytics (Tableau; exposure to Amplitude & Metabase).

Leadership & Stakeholder Management: Cross-Functional Leadership, Stakeholder & Partner Management, Corporate/Business Development Capability, Agile/Scrum.
